

Valenza Square Mirror Series

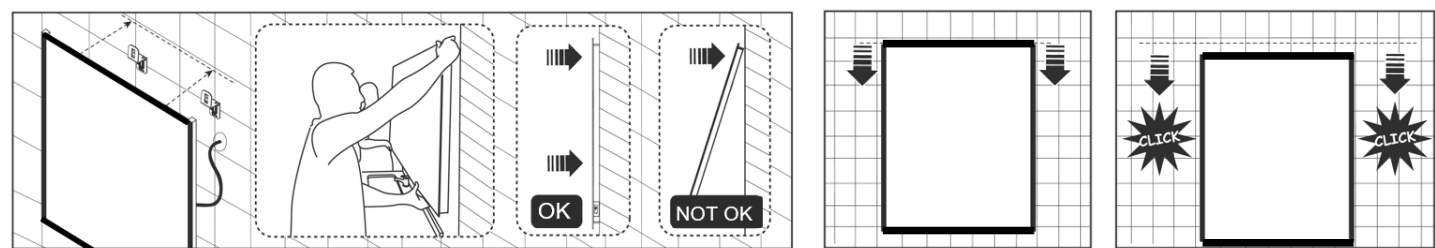

Assembly

CONNECTION

Assembly

	Light on/off. Turn the light on and off with a short press. Automatic shutdown after 12 hours. Adjusting brightness. Press the button with the mirror switched on and keep it pressed until the desired brightness value has been reached. When it reaches the minimum or maximum value the button will flash. This adjustment is saved automatically.
	Adjusting light colour. Long press and hold to change from cool to warm light and vice versa. Release when the desired light colour is reached. When it reaches the minimum or maximum value the button will flash. This adjustment is saved automatically
	Defogger on/off. Turn the defogger on and off with a short press. Automatic shutdown after 2 hours.

INFORMATION

1. The electrical connections must only be carried out by specialized personnel and functioning must be according to the manufacturer's instructions.

2. Do not use any damaged or broken light fittings.

3. Always keep connections and wires away from hot areas.

4. The flexible outer cable or cord of this luminaire cannot be replaced; if it is damaged the whole light has to be destroyed.

5. The luminaire should not be installed in any position other than the one shown in the assembly instructions nor outside the protection vol.0-1 (See Fighure1).
6. The light fitting cannot be modified or forced under any circumstances, as any modification could jeopardise safety and make this dangerous.

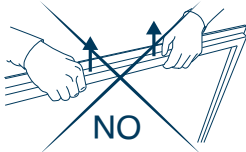

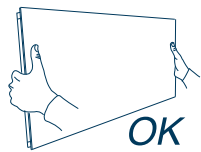

7. The light source of this luminaire is not replaceable. When the light source reaches the end of its life, the full light fitting must be replaced.

8. The light source used in this product are LED light-emitting-diodes, which are not replaceable.

9. Do not submerge in water.

10. Our products are subject to technical changes and optimizations without prior notice.
